Summary

Delete 100 Assets Using Select All Only Deletes 50

Steps to Reproduce

1. Navigate to the **Asset Manager** page.

2. Add 256 assets using CIDR notation (`8.8.8.8/24`).

3. Set **Rows per page** to 100.

4. Click the **Select All** checkbox to select all 100 visible assets.

5. Click the **Delete** button.

6. Confirm the deletion in the dialog.

Expected Result

All 100 selected assets should be deleted, and the total asset count should decrease by 100 (e.g., from 256 to 156).

Actual Result

Only 50 of the 100 selected assets are deleted. The total asset count decreases by 50 instead of 100 (e.g., from 256 to 206).
